

Lab - Research IT and Networking Job Opportunities

Objectives

- Research Job Opportunities

Background / Scenario

Jobs in Information Technology (IT) and computer networking continue to grow. Most employers require some form of industry standard certification, degree, or other qualifications from their potential employees, especially those with limited experience. The Cisco CCNA certification is a known and established entry-level networking certification that is respected in the industry. There are additional levels and kinds of Cisco certifications that one can attain, and each certification may enhance employment opportunities as well as salary range.

In this lab, you will complete targeted job searching on the web to find what types of IT and computer networking jobs are available; what kinds of skills and certifications you will need; and the salary ranges associated with the various job titles.

Required Resources

- Device with Internet access

Instructions

You will use a web browser to visit the popular job listing websites, such as monster.com and salary.com.

Step 1: Open a web browser and go to a job listing website.

In the URL address bar type <http://monster.com> HYPERLINK "http://monster.com/" HYPERLINK "http://monster.com/" HYPERLINK "http://monster.com/" and press Enter.

Note: For job listings outside of the U.S., use the following link to search for your country:

<http://www.monster.com/geo/siteselection/>

Step 2: Search for networking related jobs.

- Type the word **Network Administrator** in the **Keyword or Title** box. Click **Find Jobs** to continue.
- Notice the search results. Now, focus your search by adding terms to the search for Network Administrator. Try terms like Cisco CCNA, CCNP, CCNA Security, CCNA Voice, etc.
- Now try refining your search by adding different geographical locations. Did you find jobs in the locations you entered?

not in all regions, i tried to look for it jobs in east asian countries but didnt find any, but in Europe, USA, Canada there are plenty of free jobs positions.

- Try searching a different website. Go to <http://www.salary.com> HYPERLINK "http://www.salary.com/" HYPERLINK "http://www.salary.com/" HYPERLINK "http://www.salary.com/" and click the Job Search menu bar button. **Note:** For salary listings outside of the U.S., use the following link to search for your country: <http://www.payscale.com/rccountries.aspx>
- Add a search term like **Information Technology** to the **Job title or Keyword** field box and click **Get my salary estimate**.
- Note the large number of matching search results. Select a job title that interests you. Click **SHOW MY SALARY ESTIMATE RESULTS**.

Lab - Research IT and Networking Job Opportunities

- Spend time searching for jobs and looking through the search results. Take note of what skills are required for different job titles and the range of starting salaries.

Reflection Questions

Answer the following questions based on your research findings.

- What job titles did you search for?

Network Engineering Manager, Network Security System Analyst, Network Security Architect

- What skills or certifications were required?

All of those jobs requires a bachelor's degree of computer science, or engineering or its equivalent.

- Did you find any jobs that you previously did not know existed? If so, what were they?

i didnt knew there is such job as Wireless network engineer, i thought the network does not split into wireless and wired networks.

- Did you find any jobs that you are interested in? If so, which ones and what skills or certifications do they require?

Yes, i did, im interested in network security architecture. this job requires bachelor degree in computer science.
